Rennco’s Lift Seal heat sealing solution provides a compact, efficient alternative to impulse, band and rotary sealers. Rennco stands behind the Lift Seal™ with a 50-year tradition of innovation, experience and industry leading customer service and support.

The Rennco Lift Seal™ Heat Sealer is easy to maintain as well as quick and simple to operate. Constant temperature is maintained by a digital temperature control during the sealing process. The lower silicone rubber bar is raised by a rugged mechanical drive to meet the stationary ½” wide heated sealing bar above. This bar is covered with a special “non-stick” fabric which is advanced by simply turning a knob as the fabric becomes worn. The fabric roll is ample for months of use and is quickly replaced by snapping the new roll into position.

Digitally Controlled to Ensure Accurate Sealing Temperatures

FEATURES AND BENEFITS

• Simple, economical machine specifically designed for bagging of surgical instruments and supplies

• Compact and lightweight table top model

• The Lift Seal™ Heat Sealer will not cycle if an object exceeding 1/8” thick is in the sealing area, providing safe operation.

• Seals flat or gusseted paper/plastic, TYVEK™, Autopack™, and dust cover pouches; up to 24” wide with a ½” seal

• Model LS18D-115 seals pouches up to 18” wide
  Model LS24D-115 seals pouches up to 24” wide
  (Both produce a ½” seal)

Lift Seal is a trademark of Rennco, LLC, TYVEK is a registered trademark of DuPont, Autopak is a registered trademark of OnGard Systems.

Category Sealing Equipment

**PRODUCT OPERATION**

A. BEGIN TO USE AFTER A SHORT "WARM UP"

B. SIMPLY ENTER THE TEMPERATURE SETTING FOR THE MATERIAL BEING USED

C. PLACE THE EDGE OF THE BAG IN THE SEAL AREA

D. LIFT THE LOWER SAFETY BAR

E. IN APPROXIMATELY 2 SECONDS, THE LOWER SAFETY BAR AUTOMATICALLY OPENS FOR EASY REMOVAL OF THE SEALED BAG.

**SURGICAL INSTRUMENTS AND SUPPLIES**

Accommodates all sterile processing or sterile maintenance pouches including paper/plastic, TYVEK™, Autopak™, and dust cover pouches. Sealing conversions from one material to another requires only a temperature change.
